

Instructions for setting up the latest VPN connection.

To take advantage of the upgraded virtual private network (VPN) services, employees need to update a few settings in their Check Point End Security application.

1. In the lower right-hand corner of your screen, click the caret “^” as shown below:

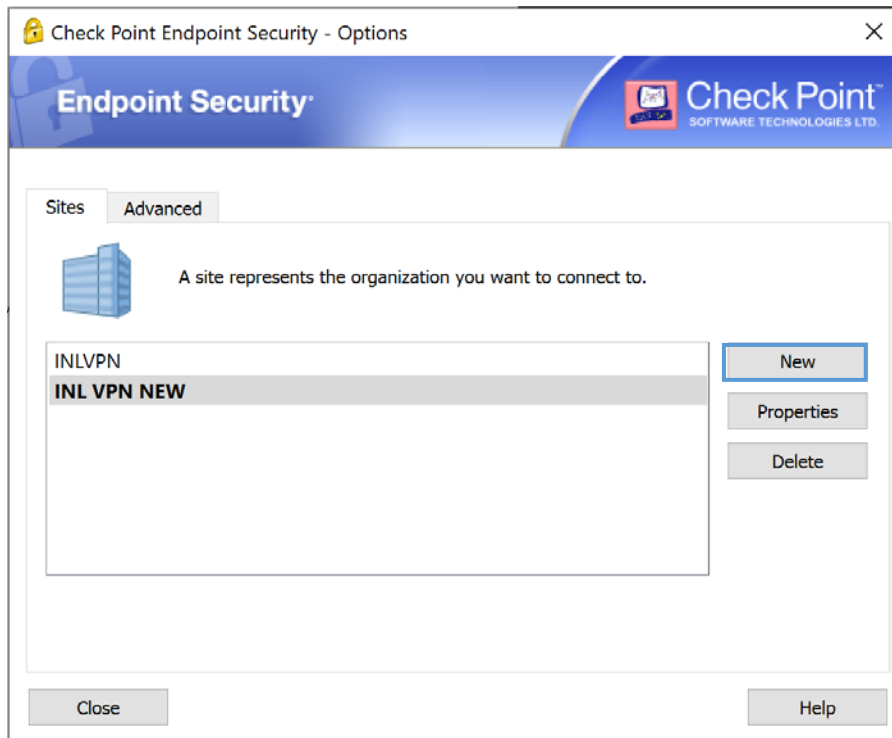

2. Open your Check Point End Security application by selecting the yellow “lock icon” from the icons in the lower right corner of your windows home screen.

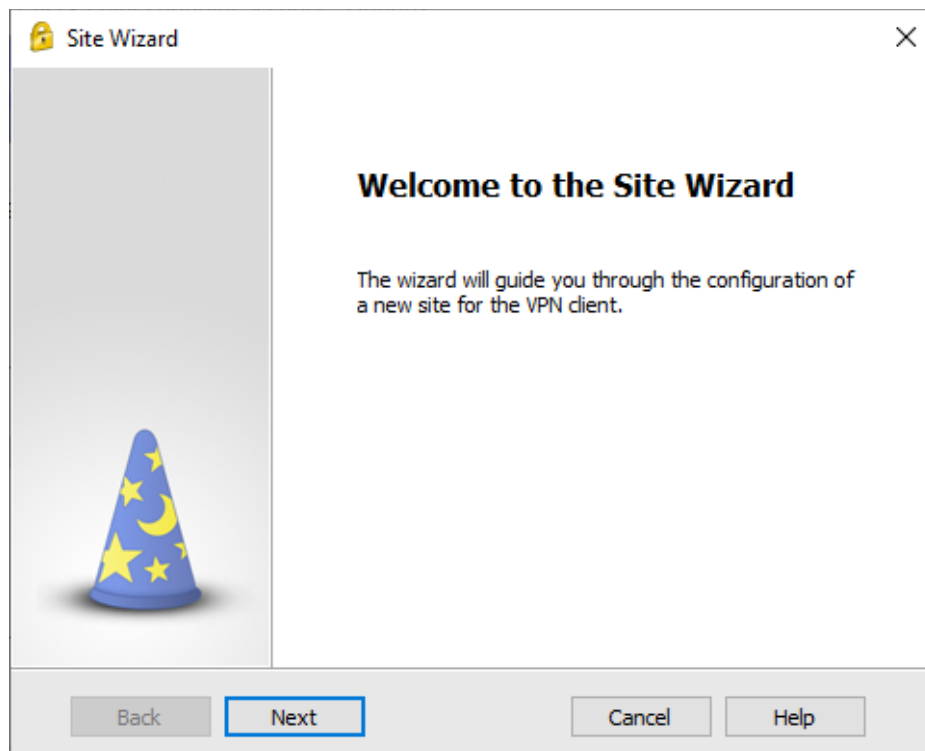

3. Right click on the yellow “lock icon” and select “VPN Options”

4. Select "New"

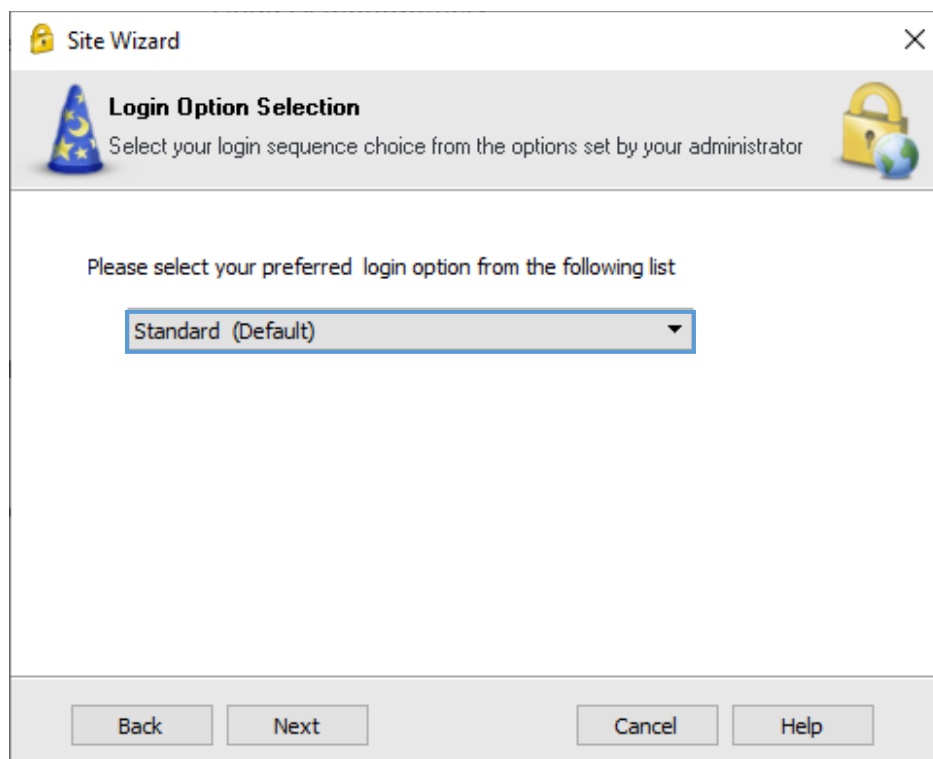

5. Select "Next"

A screenshot of the 'Site Wizard' application window at the configuration step. The title bar shows a lock icon and the text 'Site Wizard'. The main area has a light gray background. At the top left, there is a blue wizard hat with yellow stars and a crescent moon. To its right, the text 'Welcome to the Site Wizard' is displayed in bold, followed by the subtitle 'A site is your gateway to network resources.' On the top right, there is a yellow padlock icon with a globe inside. Below the header, the text 'To continue, fill in the required information and click next.' is displayed. There are two input fields: the first is labeled 'Server address or Name:' and contains the text 'inlaccess.inl.gov'; the second is preceded by a checked checkbox and labeled 'Display name:', and contains the text 'INL VPN NEW'. At the bottom of the window, there is a gray bar containing four buttons: 'Back', 'Next' (which is highlighted with a blue border), 'Cancel', and 'Help'.

6. Enter "inlaccess.inl.gov" under the "Server address or Name" field
7. Enter "INL VPN NEW" under "Display Name" and then click "Next"

The dialog box is titled "Site Wizard" and has a close button (X) in the top right corner. The header bar is light gray and contains a blue wizard hat icon on the left, the title "Login Option Selection" in bold, and a yellow padlock icon with a globe on the right. Below the header, the text "Select your login sequence choice from the options set by your administrator" is displayed. The main area contains the instruction "Please select your preferred login option from the following list" followed by a dropdown menu showing "Standard (Default)". At the bottom, there are four buttons: "Back", "Next", "Cancel", and "Help".

8. Select "Standard (Default)"

The dialog box is titled "Site Wizard" and has a close button (X) in the top right corner. The header bar is light gray and contains a blue wizard hat icon on the left, the title "Authentication Method" in bold, and a yellow padlock icon with a globe on the right. Below the header, the text "Select the authentication method to be used." is displayed. The main area contains five radio button options: "Username and Password", "Certificate", "SecurID" (which is selected), "Challenge Response", and "Secure Authentication API (SAA)". Each option has a brief description. At the bottom, there are four buttons: "Back", "Next", "Cancel", and "Help".

Site Wizard

Authentication Method

Select the authentication method to be used.

☐ **Username and Password**
Click if you use an account name and password.

☐ **Certificate**
Click if you use Hardware tokens or any other certificate type.

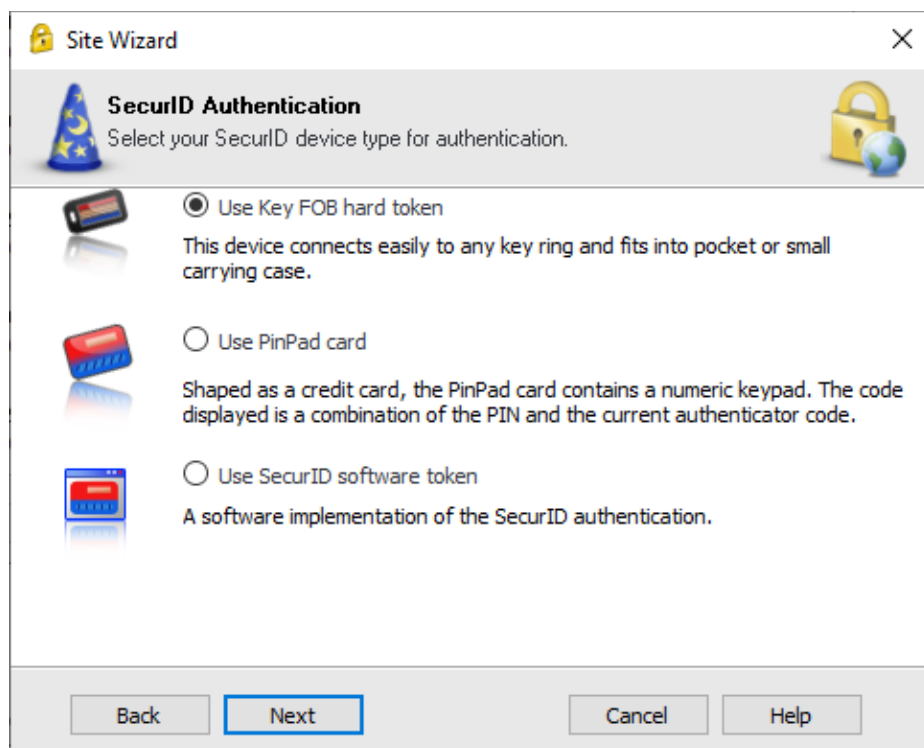

☒ **SecurID**
Click if you use RSA SecurID.

☐ **Challenge Response**
Click if you are required to provide different responses to a challenge.

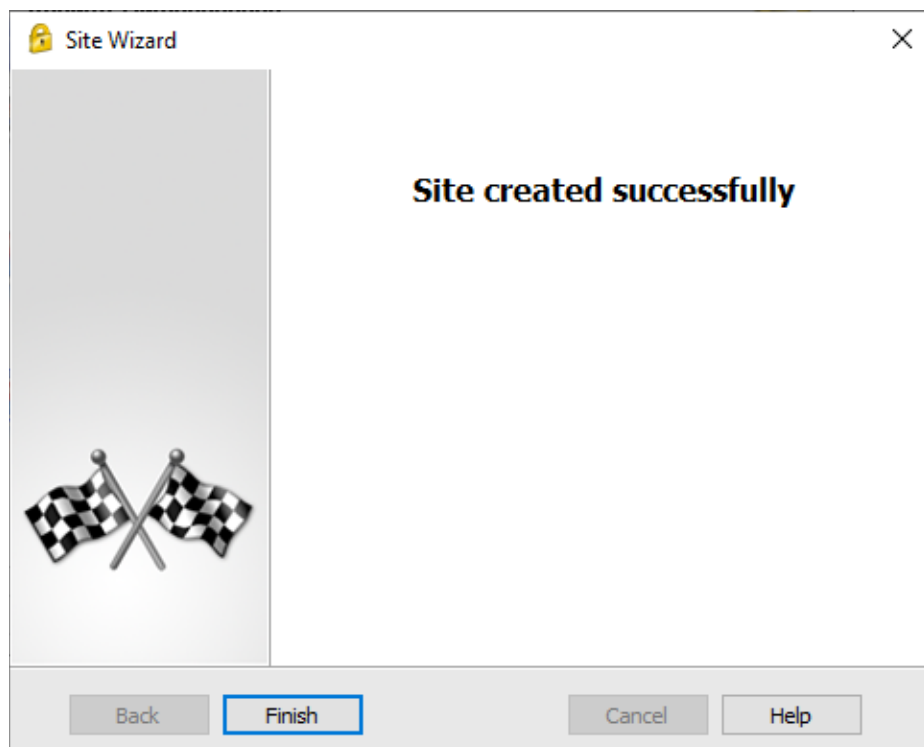

☐ **Secure Authentication API (SAA)**
Click if you use third party authentication.
